

50% OFF EXFOLIATING SKIN TREATMENTS

Clear T-zone

Increases blood circulation

Removes dull skin

PEEL & REVEAL YOUR BEST SKIN EVER

Winter is the best time of the year to have professional exfoliation treatments as the sun is not as strong and we are hibernating in doors for the few months of the cold weather. During the months of winter our skin can feel dry, flaky and dehydrated. This is due to our oil gland slowing down in the cold and also from all the artificial air of heaters. Exfoliation can help to remove the stubborn dehydrated surface layer on our epidermis making it easier for our skin to absorb product.

Now at Looks Clinic we are offering 50% off professional skin exfoliation treatments. Our skin peels will help to reveal a soft and smoother skin while improving collagen and elastin in your skin. Whether it be hyper pigmentation, dry- dehydrated skin, scarring or just dull lifeless looking skin, our qualified skin therapists will transform your skin into its best ever.
